TENTH ANNUAL BLUE GRASS FAIR OPENS AT LEXINGTON, MONDAY, AUG. 2

Best Fair in the Middle West—Numerous Attractions, including John C. Weber's Prize Band of the World.

WILMINA HAMMANN, SOPRANO WITH WEBER'S BAND, BLUE GRASS FAIR, LEXINGTON, KY., AUG. 2 TO 7.

SINCE its organization in 1906 the Blue Grass Fair has taken full rank with largest and best state fairs and expositions in the country. It has justly become known as the largest horse show in the world. It is the only fair which offers a full quota and a classification for breeding classes of the three great breeds of American horses as well as show classes, simplified and arranged in a manner which makes their distinction clear.

Pitched on a larger and more extensive scale than ever before, with the certainty of increased interest on account of various added features, this year's Fair promises to eclipse all previous records.

Numerous additions and improvements have been made in the matter of show rings and amusement features have been secured of a kind and to an extent that justify the belief that the Fair will not only prove more valuable than ever to the five stock interests of Kentucky, but also more attractive to those who visit it. In addition to the wrestling and yearling divisions, five stakes are offered in the show classes for saddle horses.

Attractive Program Each Day. One of the most attractive programs for the week will be on Wednesday, when the classes for standard bred horses will be shown.

In addition to the cash premiums offered, seasons to the leading horses in service are donated by various owners and should attract the attention of the entire horse world.

The Fair will open on Monday, Aug. 2, when an attractive racing program has been arranged, interesting show rings will be seen and John C. Weber's band with some of the best soloists and popular singers known to the musical world will be here.

High class artists will be heard in front of the grand stand in choice selections and popular ballads every afternoon and evening, and there is a great treat in store for the music loving public of the Blue Grass region.

On Tuesday, the 3d, the big mule show, always a most interesting feature of the Blue Grass Fair, will be shown, and the classes for poultry and pigeons will be judged in the Poultry house. Great show rings, including the \$500 stakes for saddle bred colts, foals of 1915, the Kentucky stakes for five gaited saddle horses two years old, made by Weber's Band and Vocalists will help out a great program.

On Wednesday morning the breeding classes for standard bred horses, as mentioned above, classes for Jack stock, the Blue Grass stake for five gaited saddle horses, stallion, mare or gelding four years old and over, etc., will be shown in front of the grand stand.

Thursday is always a great day, and an extra program has been arranged. The forenoon will be taken up with the breeding classes for American saddle horses, the prizes for which are particularly rich and desirable, and certain to bring about a magnificent show. In the afternoon will be witnessed the Kentucky stake for five gaited saddle horses for three years old and under and an excellent racing program for running and harness horses, also various rings in the show classes for roadsters, fine harness horses, etc.

Friday will be Shetland pony day, in addition to a varied program of show classes, running races, harness races and other attractive features.

Thoroughbreds Saturday. Saturday is always known as Thoroughbred day, when we see rings

which bring together many of the most noted thoroughbred horses from the greatest nurseries in Kentucky. In addition to cash premiums, seasons to such great horses as Jack Atkins, Fair Play, Trap Rock, Waterville, Stalwart and others are offered.

The afternoon program is one of the most interesting of the entire week, as it includes all championships, in which final contests occur between winners of the individual classes during the preceding days of the Fair.

The rule governing the classes requires all animals eligible to show in these rings or forfeit money won in the previous shows, and this rule will be strictly adhered to, thereby assuring large fields and affording the public the opportunity of seeing the winners brought together.

The week promises to be not only a gala one for Lexington, but a record breaking one in the history of the Blue Grass Fair.

Foot and Mouth Disease. On account of the disease now prevalent throughout the country and the existing quarantine, the management of the Blue Grass Fair has deemed it wise to eliminate the classes for cattle, swine and sheep.

They regret they are compelled to do so, but under existing circumstances could not do otherwise.

Ample Hotel Accommodations and Railway Facilities.

The comfort and convenience of all exhibitors and patrons will receive the careful attention of the management. Convenient railway facilities, ample hotel accommodations and a better organization in every way for handling the crowds insure a pleasant and profitable time to all who accept our cordial invitation to attend this great annual event.

The board of directors desire to take this opportunity of expressing their appreciation to those whose efforts have helped build this institution and to ask for their co-operation in the future.

Speed Program. Three running races and two harness races will be contested each day at the Blue Grass Fair Aug. 2 to 7, the conditions and classes to be announced at a later day.

The running races will be under the supervision of Mr. J. P. Ross, which assures an attractive program in that department.

Purses will be given for trotters and pacers each day, the entries to which will close about ten days before the opening day of the Fair.

Rules of the National Trotting Horse association will govern all harness events.

Woman's Department.

The Woman's Department of the Blue Grass Fair, to be held at Lexington Aug. 2 to 7, will be more important and extensive this year than ever before. The premium list has been revised, and classes offered cover almost every kind of woman's work and table luxuries. The third floor of the Art hall is given entirely to this department and is usually one of the most attractive exhibits of the Big Fair.

Half Fare Rates to Fair. Do not fail to visit the Blue Grass Fair at Lexington the week of Aug. 2 to 7. One fare rates will prevail on all railroads in Kentucky. Every afternoon and evening, beginning Sunday, Aug. 1, there will be magnificent band concerts, with high class vocalists in a grand sacred concert.

PROPER FEED FOR DRY COWS

Animal's Digestive Organs Should Be Given Rest by Giving Materials to Build Up Calf.

(By W. F. FERRIS.) As soon as a cow stops giving milk feeding should begin at once for the following year. There are three special purposes for which she should be fed during her brief vacation.

First, if she is a good, hard-working cow, her last year's work has been wearing on her and her digestive apparatus should have a rest as far as practicable. To accomplish this purpose feeds of cooling and light, bulky nature, as pasture grass, in summer and silage in winter should be supplied.

Secondly, in feeding the dry cow it is essential to build up the future calf. Nitrogenous or protein feed must be given for this purpose. About all the alfalfa or clover hay that the cow will eat, combined with a little bran, is excellent.

The third purpose in feeding is to store up in the cow's body fat to be drawn upon later, as well as stamina for her coming work. To make fat nothing is better than corn, with a small amount of other grains. And there is nothing better for imparting stamina to an animal than oats.

MUCH DEPENDS ON SPRAYING

Excellent Results Secured by Missouri Apple Grower After Spraying by Experiment Station.

In an orchard near Columbia, Mo., one hundred trees were sprayed by the Missouri experiment station and the owner said in a public meeting that he picked more marketable apples from these one hundred trees than

Terminal Portion of Young Apple Tree, the Leaves Dwarfed and Curled by Injury of the Apple Leaf Hopper.

from the remaining 5,600 that were not sprayed.

The fact is that after the disease and insects have become serious, as they were in the case just mentioned, it is practically impossible to make an orchard business pay without spraying. Thus the business of fruit growing in a great many cases absolutely depends upon spraying.

NEED OF SOIL INOCULATION

Different Kinds of Bacteria Required for Each Plant With Exception of Alfalfa and Clover.

Leguminous crops such as clover, peas, beans, alfalfa and the like, may fail to do well sometimes, even when the soil is in good condition and good seed is used. These plants take their nitrogen from the air, and they cannot do this unless there is in the soil a certain kind of bacteria which changes the air nitrogen to a form the plant can use.

The bacteria develops on the roots of the plants, if present, and the presence or absence of them may be known by examining the plants. Pull up a few plants and if the right kind of bacteria are in the soil there will be nodules—small wart-like lumps—on the roots. A different kind of bacteria is required for each plant, with the exception of alfalfa and sweet clover, which have similar requirements in this line.

The bacteria, if needed, may be supplied in either of two ways. One way is to drag or drill into the soil about 200 pounds to the acre of soil from a field where the kind of crop to be planted has been grown successfully. The other way is to treat the bacteria wanted.

The United States department of agriculture will supply any farmer with enough of this culture, free, to treat two bushels of seed.

GOOD SEEDBED FOR ALFALFA

Proper Condition Can Be Obtained by Early Plowing and Working With Disk and Harrow.

A mellow, well-compacted soil makes a good seedbed for alfalfa. The capillary attraction of the subsoil and the top soil must be well restored; the land must be firm with only a little loose dirt on top, not much more than is needed to cover the seed.

This condition can be obtained by early plowing and a great deal of work with the disk and harrow. If the soil is adapted to alfalfa and is properly prepared, you can be as certain of getting a stand of alfalfa as any other crop.

POSTED

The undersigned hereby give warning to all persons not to trespass upon our lands for any purpose whatever as we will prosecute all offenders to the full extent of the law. Hunters and Fishermen especially take notice.
